Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for index.html

---Checker Input---

Show ☑ source ☑ outline ☑ image report

[Options…]

Check by [file upload ⌄] [Choose File] No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check]

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

[Message Filtering]

Document checking completed. No errors or warnings to show.

Image report

The elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition. `img`

Empty textual alternative—Omitted from non-graphical presentation

The following images are marked to be omitted from non-graphical presentations (). `alt=""`

Purely decorative images belong in this category. Also, iconic images that are redundant with text next to them belong here.

If the page would become less understandable if the presence of an image was concealed, the image doesn't belong here. In that case, a textual alternative should be supplied or if the markup generator does not have a textual alternative available (because the user refused to provide it), the attribute should be omitted by the markup generator. `alt`

Image	Location
Not resolvable	From line 31, column 9; to line 31, column 39
